

# The W.S.R Advantage

Weight. Speed. Reliability

Recovery

## The Lightweight Advantage

At only **24lbs**, the **G5Twin** is a small and lightweight recovery machine capable of handling the tough demands of **industrial/commercial recovery**

The **G1Single** delivers comparable recovery rates to larger single-cylinder units at only **22lbs** without the hassle or bulk, ideal for **residential and appliance recovery**

## The Speed Advantage

A Custom 7in, 10 blade turbine fan blasts over 700cfm of high static pressure cooling air through the machine

Up to **50°F cooler** compressor heads help refrigerant stay cool and dense, **maximizing throughput** even in the highest ambient temperature conditions

As a result the entire unit runs cooler, leading to **better operation and a longer life**

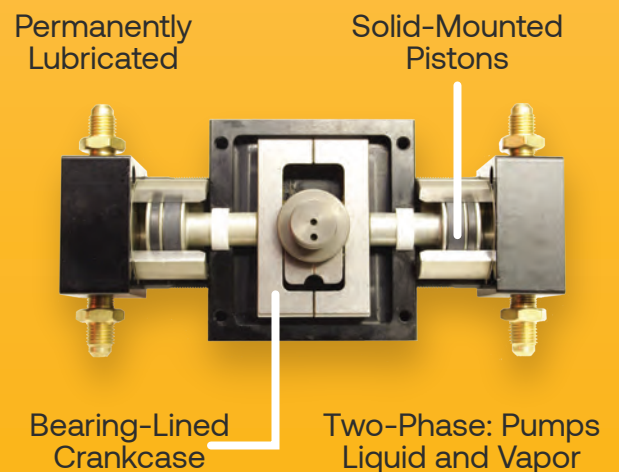

## The Reliability Advantage

The **Permanently-Lubricated** crankcase is isolated from refrigerant, eliminating bearing contamination

The **Solid-Mounted** pistons eliminate wrist pins and bushing wear, ensuring full-speed recovery for the entire life of the machine

**Bearing-Lined** crankcase evenly spreads the load of each stroke, preventing seized compressors

# Fast Recovery with the G5Twin

Recovery

**Above:** Chillers containing **4000lbs** of R134a being recovered with a **G5Twin** in the sweltering heat of Saudi Arabia. What once took a week now takes **only 18 hours** with the **Speed and Reliability** of the **G5Twin**

**Below:** On a R407a system retrofit of a low temperature ice cream case, the **G5Twin** recovered **600lbs** of R22 in record time using the **Push-Pull Method**

**Above:** At times running, **8-10 hours a day**, 5 days a week. The **G5Twin** has proven to be extremely **Fast and Reliable**. Not a problem, thanks to the G5Twin

**Below:** G5Twin used daily in a reclamation facility for tank to tank transfers
